Description

ID Card Door Lock - IC-Integrated Circuit Card Lock System

Utilizes Encrypted Key Card generated by compatible Encoding Hardware & Management Software.

Requires insertion of the Secure Encrypted Smart Keycard to grant or reject access.

A Mortise Lock designed with impact resistance High Quality Solid Steel, Chipsets and Encrypted secure IC-Smart card made in Germany by SIEMENS. High quality security Steel Deadbolt Lock with double Anti-Friction & Anti-Pick Latch, excellent maintenance free reliable lock system. Take a look at the illustrative sample image below that shows all included components of this lock. Include the Front & Rear Steel Housings, Mortise with Deadbolt, Latches & Duplicate-proof Mechanical Keys.
Features instant Panic Release (Deadbolt & Latch auto-release), approximately 18-months of battery life, duplicate-proof Mechanical Keys, auto-engage within 7-seconds of closing actual door, Free Passage option (Deactivate Lock For A Meeting), Do Not Disturb function (By engaging deadbolt, option to override with Master Keycard), blacklist lost keycards, remembers the last 200-opening records, retrievable Lock records (Will require this Data Collection Card).

How Does This Lock Works?

This Lock has an inbuilt card reader with a visible slot for Keycard (s) insertion. The Keycard (s) stores the Digital Signature Encrypted by the compatible Encoder for acceptance only by this lock, and upon verification grant or restrict access. Simple…. Perfect option for Hotel/Motels, Offices, Gyms, Multi-Dwelling Apartment Buildings, Nursing & Group Homes, and other Access Control applications. Not sure if this Lock will work for you? Click “Ask A Question About This Product” or contact us at 708-841-8300 to inquire about how to customize Locks and required Software for your operation.

Required Hardware/Accessories For Commercial Operation:

Note: For simple home/office/Gym solution that requires less than 15-Locks, Click Here To View Pre-Programmed Lock Options. (Pre-Programmed with 5-Keycards, Delivered To Your Door-steps In 100% Working Condition & Ready To Install)

1. Keycard Encoder - This machine Securely Write information the Lock have to follow on the Keycards. Please Click here to read more... IC-Keycard Encoding Machine

2. KeyCards - Your means of communicating with the Lock. Stores and interpret information Encrypted by the Encoding Machine. Click here to read more .. IC-Lock Keycard

Optional Hardware/Accessories For Commercial Use:

3. Data Collection Machine - Hand-held Data Extractor. Provides Transaction Audit of all Keycards used on the Lock. Click here to read more .. IC-Lock Data Collector

4. Data Card - Also a Data Extractor, cheaper alternative with limited storage. Captures transactions From The Lock. Click here to read more... IC-Lock Data Collection Card

5. Energy Saving Switches - Saves you money by eliminating the use of Batteries to power your locks. Not just that alone, remember that each time you insert your keycard it initializes the lock by injecting power. This switch prevents Lock power drain due to oversight of abandoning keycard in the Lock Keycard-Slot by automatically cutting-off lock’s power after few seconds. You can read more about this device here... Energy Saving Switch

6. Room Status Doorbells - With Doorbell to call Room Occupant, display the Room Number, Room Status if occupant “Do Not Want To Be Disturbed”, Shows Vacant Room. Click here to read more… Room Status Doorbells.

All our Locks are fully customizable, and we provide excellent Install & Tech Support during and after the process of Hardware & Software install. Comes complete with all required Latches, Bolts, Screws, Template and Assembly Diagram. Click specification tab to view actual lock size and other technical information.

1-Year Warranty Applies
